User clicks check boxes to select any combination of individual tools which then expand to fill the space.

This is the openFDA web destination for all food product recalls monitored by the FDA. When an FDA-regulated product is either defective or potentially harmful, recalling that product—removing it from the market or correcting the problem—is the most effective means for protecting the public. Please note: Data prior to mid-2012 is incomplete and has not been validated with internal FDA data.
