Severity: Class I Recall (most critical)
Class II Recall

View historical food recalls by date range and level of severity.

Only in rare cases will FDA request or order a recall. But in every case, FDA's role is to oversee a company's strategy, classify the recalled products according to the level of hazard involved, and assess the adequacy of the recall. Recall information is posted in the Enforcement Reports once the products are classified. For more information, visit FDA.gov.

Recalls are almost always voluntary, meaning a company discovers a problem and recalls a

product on its own. Other times a company recalls a product after FDA raises concerns.
